Statement of Duties

Provides emergency services that protect life, property and the environment, including fire protection, rescue, emergency medical care, hazardous materials incident control and disaster services. Responsible for equipment and apparatus maintenance and performs tasks to ensure that equipment and other emergency response resources are working safely and properly and are maintained in a continual state of readiness to meet all emergency situations. Provides administrative support of business and financial operations. Assists with fire code enforcement and fire safety programming. Assists with Fire Department training program. All other related work as required.

Supervision

Works under the general direction of the Fire Chief. Fire prevention duties are assigned and coordinated by the Senior Firefighter/EMT or Fire Prevention Supervisor. Duties require independent judgment, initiative, and the ability to follow through without direct supervision.

At emergency incidents, works within the Incident Command System and may serve as Incident Commander or Section Chief when ordered or in the absence of a superior officer.

Job Environment

Some work is performed under typical office and workshop conditions. Some work is performed teaching fire safety to school students and the general public. Some work is performed in commercial, industrial and residential buildings during fire safety inspections required by the Massachusetts Fire Code. Some work is performed under typical emergency conditions, consisting primarily of operations at fires, accidents, medical emergencies, and hazard emergencies. Some work is performed under poor weather conditions and during nighttime. Emergency work may involve considerable personal discomfort and danger, including exposure to fire, toxic substances and other hazards. Firefighting and rescue tasks often involve extreme physical exertion such as lifting heavy objects or persons while wearing full protective clothing and SCBA. High noise levels often make communication difficult. Work is often performed in darkened conditions.

Sterling Fire Department

The Firefighter/EMT is frequently required to respond to emergency calls outside normal business hours and may occasionally be contacted at home to respond to investigate potentially dangerous situations.

They operate personal computers, standard office software, fire and EMS service computer system software and standard office equipment.

The Firefighter/EMT makes periodic contact with the supervisor for the purpose of reviewing responsibilities and progress on assigned projects. Makes frequent contact with Town officials, vendors, business and home owners, contractors, and personnel in other fire departments regarding work being performed. Some contacts require technical expertise, teaching skills, persuasiveness, discretion and tact. Other contacts are with co-workers for the purpose of exchanging information about the work at hand and completing tasks at a fire scene or other emergency. Makes regular contact with the general public when teaching and performing inspections and with victims of fires, accidents, medical and other emergencies. Contacts are, in writing, in person, in personal meetings and training programs and by telephone, E-Mail and radio communications.

Errors in judgment, performance of duties, and use of equipment could reduce Department effectiveness, seriously endanger life and property, cause monetary loss, lead to delayed and insufficient response of required resources to emergencies, and result in direct financial and legal repercussions for the Town.

Has access to extensive confidential information, such as personnel records, criminal investigations and records, lawsuits and personal information about citizens.

Essential Functions

The essential functions or duties listed below are intended only as illustrations of the various types of work that may be performed. The omission of specific statements of duties does not exclude them from the position if the work is similar, related or a logical assignment to the position.

Responds to fires, accidents, medical emergencies, hazardous conditions, and other emergencies providing assistance that protects life and property. Examples of tasks include: fire suppression using hoses, nozzles, ladders, self-contained breathing apparatus (SCBA) and other specialized equipment; search and rescue of trapped victims; victim extrication at accident scenes; ventilation of fire buildings; emergency medical care; isolation and control of hazardous materials accidents; and related duties as required.

Operates power, electrical and other firefighting and rescue equipment including hydraulic and air operated rescue tools, power saws, positive pressure fans, generators, portable pumps, forcible entry tools, self-contained breathing apparatus (SCBA) and other fire department equipment.

Operates EMS equipment including semi-automatic defibrillator, portable and on board suction units, portable and on board oxygen devices, splinting devices, stretcher, CMED radios and other equipment necessary for patient care and transport.

Drives and operates department ambulance(s), heavy fire apparatus, including pumpers, aerial ladder, and rescue truck.
